

10 May 1955

MEMORANDUM FOR: Colonel White

1. The Inspector General, during his survey of the Office of Logistics, recommended that [redacted], "Detached Station Supply Procedures," be issued without further coordination.

25X1A

2. Working level coordination with all involved components has been accomplished, and the Deputy Director (Plans) has concurred in its issuance subject to security conditions that:

- a. The handbook be Agency-sterile, and
- b. The book be identified as a U. S. Government document.

2. The handbook has been made Agency-sterile, and the printed version will not show the handbook number, authentication or distribution. In addition, the following statement will appear on the inside cover of each copy:

"This handbook is for use and retention only by official installations of the U. S. Government."

Distribution will be made by means of a dispatch to each station.

3. Recommend approval and forwarding to Regulations Control Staff for submission to the Deputy Director (Plans) for authentication.

4. In editing the handbook, it was discovered that no criteria exist for the establishment of detached stations, that is, stations which have responsibility but not accountability for property. It is recommended that the responsibility for developing such criteria be assigned to the Office of Logistics. A memorandum requesting that office to develop such criteria is attached for your signature.
